Creating Stable Links to Resources in LibrarySearch

Stable URLs for resources retrieved in LibrarySearch are found via the link icon to the right of the resource title.

When you click the Permanent Link icon, a box will drop down with a shortened URL and a copy button. Click the copy button to copy the URL to your clipboard.

Paste the shortened URL into another document such as a Word or text document:

http://tinyurl.com/ycog2eza

LibrarySearch shortened URLs have the Library’s EZProxy prefix built in, so you don’t have to add it manually. The URL above is ready to use for access on- or off-campus.
